

MEI® VN 2600 banknote validator

Fully optical sensors

Ensure consistent, high-quality recognition and security

Removable cassette

300, 500, 700 and 1000 stacker options

The banknote validator you can trust to increase your profits

With over 2 million banknote acceptors sold worldwide and 20 years of advancing technology, the MEI® VN 2600 banknote validator uses:

- Non-contact sensing, eliminating contact points
- Patented smooth plastic tools, assuring no edges to catch a damp banknote
- Secure multi-wavelength sensors for high security

These features increase banknote acceptance and provide the industry's lowest jam rate, resulting in happier consumers, fewer service calls, and more profitable locations.

Enhanced security

MEI's current products rely on fully encased, optical sensors with advanced algorithms to reduce the acceptance of counterfeit currency and ensure consistent, high-quality recognition. The VN 2600 banknote acceptor's sensors greatly reduce vulnerability to both string frauds and invalid banknotes.

High four-way acceptance rate

Satisfy customers by accepting torn, wrinkled, Faded or dirty banknotes. Little or no banknote preparation is required and banknotes can be fed four ways (in either direction, face up or down).

Easy, time-saving setup

The VN 2600 banknote acceptor's design ensures convenient access to all switches. Easy-to-read labels explain switch settings. With the VN 2600, options can be easily customised on location via a simple-to-use configuration coupon.

MEI FLASHPORT™ for future flexibility

The MEI® VN 2600 accepts 5 € and 10 € banknotes in circulation. Also, the unit's re-programmable flash memory enables quick, easy updates of software files such as new currency designs or value coupons.

MEI® VN 2600 banknote validator

VN 2600 Banknote Validator Specifications

Acceptance Rate

90% or greater for 5 € and 10 € banknotes

Banknote Insertion

Lengthwise, four-way (face up or down, either direction)

Transaction Speed

Approximately 4 seconds (from banknote insertion to completed bill-stacking)

Interfaces

MEI Serial Protocol

MDB

Multiple Pulse-Vending

Power Sources

2 to 45 VDC (MBD), 90 to 135 VAC, 60Hz or 18 to 28 VAC, 60Hz

Power Consumption

Standby: 5 Watts

Acceptance: 10 Watts

Full Stack Max: 50 Watts

Escrow

One banknote

Capacity

300, 500, 700 and 1000 bill capacity upstacker

Approximate Shipping Weight

4 pounds

Environment

Operating Temperature: -15°C to 60°C

Storage Temperature: -40°C to 70°C

Why choose MEI?

MEI has focused continuously on the needs of the vending industry for the last 30 years; this industry has seen innovation, invention and dedication passed from MEI to the vending world.

MEI is one of the largest manufacturers of electronic coin change givers, bill acceptors, cashless payment systems and other unattended transaction systems. Over a billion transactions are made every week in 90 different countries using products from MEI.

Features and Benefits

- High acceptance rates
- Industry's lowest jam rate
- Enhanced security to protect profits
- Fully optical sensors with advanced algorithms
- Sensors are designed to divert liquid from "salting" attempts. If "salted", the banknote acceptor is recovering without the need for a service call
- Water resistant
- User-friendly design
- Low maintenance
- Options can be easily customised on location
