stacker and removable security
cashbox

→ **A complete product range with unique features, backed by over 40 years world-wide references**

For Rail Mass Transit Ticket Vending Machines, Add-Value Machines for Smart-Card re-valuation, Car Parking Lot Pay-on-Foot or Pay-and-Display Terminals, Gasoline Self-serve Vending and any other automated high value vend, as well as for Utilities' Pay Terminals and Banking applications.

The benefits to operators of this unique range include:

- Spectral Colour Analysis - proven security of operation, able to cope with multi-series banknote printing.
- Mechanical integration - identical fixing points, same bezel for all models.
- Flexibility of arrangement - unique left/right mounting points
- Removable security cashbox (56 and 57 models only) - front/rear position 1000 or 2000 banknote capacity interchangeable cashbox.
- Fast-opening access without external tools.
- One standard power supply connector and one standard connector for communications interface.

- Software integration – All models work on the same protocol and commands, unique possibility to download new banknotes through a network, save time and cost.
- Support tools for monitoring diagnostic and configurations, based on Windows® platform
- Universality - all the world's major banknote sets can be supported and are continually updated.

The SODECO™ BNA500 series brings you a unique level of performance and range of advantages, summarised in the checklist. For more detail about the mechanisms that best suit your requirements, see the individual model datasheets.

- ✓ **Highest banknote acceptance**
- ✓ **Best ever reliability**
